Secured area elevator usage

Personnel using secured area elevators must ensure the elevator doors close completely when they exit to prevent unauthorized access to security sensitive areas.

Personnel in elevators are required to challenge others who are not displaying their badge or do not authenticate their badge at the appropriate card reader.

Non-compliance will result in badge confiscation and/or a Breach of Rules Notice (BORN) citation issued by the Airport Security Division and/or additional fines imposed by the Transportation Security Administration.

Remember, security is everybody’s business!
