

# **Security Awareness**

## **Monthly Focus**

**Volume 13 , Quarter 2 , Issue 4****April 2026**

### **Securing Worksites for Safety**

Our collective focus is on addressing the growing concern of unsecured work sites across terminals and concourses, which create significant safety risks for both personnel and external customers. Unsecured areas often contain tools and equipment that could be misused by unauthorized individuals, increasing the potential for harmful or unintended incidents.

It is essential that all work areas are thoroughly secured at the conclusion of each workday. Taking the time to properly close out a site not only protects valuable equipment but also safeguards the broader environment. In addition, every work site must display the appropriate signage, clearly identifying the project name along with points of contact. This ensures that if an unsecured area is discovered, the appropriate project team can be notified immediately and corrective action can be taken.

By maintaining diligence and accountability in securing our workspaces, we contribute to a safer, more controlled environment for everyone.

### **Remember, Security is Everybody's Business!**

The Department of Aviation's Safety & Security Division is responsible for managing an effective Airport Security Program that ensures a safe and secure environment at the world's busiest and most efficient airport while exceeding customers' expectations and complying with applicable regulations, laws and codes.

If you have questions, please contact the Safety & Security Division at [SecurityID@atl.com](mailto:SecurityID@atl.com). Thank you for your continued support of the Airport Security Program.
